

Living Lab Turin, Italy

NBS description

Two local NGOs, Orti Generali together with Comitato Mirafiori Borgata, transformed the landscape and green area adjacent to the ruins of the Castle of Mirafiori dating back to the 16th century in the Sangone Park. The NBS intervention also involved the renovation of the altar inside the area of the Bela Rosin Mausoleum. Newly planted vegetation including hedges outlining the ancient layout of the castle. Visitors can now learn about the historical-environmental information on tailor-made panels. This NBS intervention has enhanced the recreational and educational offer in Sangone Park while valorising the historical site and artistic heritage.

Aim & goals

Overall goals of the NBS include improving the green infrastructure and socio-cultural fabric of Mirafiori including:

- transforming the green area around the ruins of the Castle of Mirafiori
- valorising the cultural heritage of the site
- providing quality green spaces
- enhancing the recreational value of the Sangone Park.

Target groups (beneficiaries)

- Local residents who want to discover this historical part of the Sangone Park
- Turin citizens visiting the Mirafiori Sud district

Main responsible partner

Orti Generali, coordinated all project activities
