

## Living Lab Turin - Mirafiori Sud

### NBS description

Creation of an extensive green roof on a currently abandoned public building, located in an area named WOW in the Mirafiori Sud district. The green roof covers an area of 140 sqm and is intended to be a “natural lawn” by sowing a mixture of seeds from stable meadows of northern Italy. These seeds can be calibrated to be used in plains and mountain areas. Further extensions are foreseen.

### Aim & goals

The NBS addresses multiple dimensions:

- Experimenting with technical and administrative issues relevant to green roofing technical implementation.
- Promoting the re-use of the abandoned building, representing a first step in proposing innovative uses of green infrastructure by implementing the green roof in a small part of the roof
- Long-term goal is to extend it further to other parts of the roof.

### Target groups (beneficiaries)

- local residents
- local network of farmers (Codiretti), manage a local food market within the WOW area
- customers of the farmers market
- local NGOs
- students and teachers of surrounding schools,
- disadvantaged people

### Main responsible partner

NGO OrtiAlti coordinated, designed and managed the implementation of the green roof and will maintain the roof until the proGREG project end.
